- Cleaning Cloth
- Dust Cover
- User's Guide/Warranty Card
- Registration Card

### Earbuds

1. Insert the 3.5mm audio jack on the Earbuds into the 3.5mm stereo headphone jack on the iPod nano or any portable audio device.
2. Fit the Earbuds comfortably in each ear.
3. Volume level can be adjusted using the volume control on the iPod nano or portable audio device.

### Crystal Case

1. Check that the Crystal Case is separated into two panels (front and back) before installing the iPod nano. The front panel has a window for the iPod nano screen as well as a window for the click wheel.
2. Place the iPod nano onto the back panel so that the screen and click wheel on the iPod nano are facing up. Make sure the iPod nano is flush with the crystal case on all sides.
3. Place the front panel of the Crystal Case onto iPod nano and align the two so that the circular window on the front panel of the Crystal Case aligns with the click wheel on the iPod nano. The 2 panels of Crystal Case and the iPod nano should be flush on all sides.
4. Pinch all 4 corners of the Crystal Case until it is snapped closed securely around the iPod nano.

### Silicone Case

1. Insert the screen end of the iPod nano into the bottom opening of the Silicone Case with the screen and click wheel of the iPod nano facing the window-cut of the Silicone Case.
2. Slowly pull the Silicone Case down over the iPod nano until the top and bottom of the Silicone Case are flush with the top and bottom of the iPod nano. The screen and click wheel of the iPod nano should align with the appropriate windows on the Silicone Case.

### Audio Splitter

1. Insert the 3.5mm audio jack of the Audio Splitter to the 3.5mm stereo headphone jack on the iPod nano or any portable audio device.
2. Connect up to 2 sets of earbuds or headphones to the 3.5mm audio inputs available on the Audio Splitter.

### Mesh nano Sleeve

1. Insert iPod nano (screen end first) into the Mesh nano Sleeve allowing access to the 3.5mm stereo headphone jack of the iPod nano.

### nano Sock

1. Insert iPod nano (screen end first) into the nano Sock allowing access to the 3.5mm stereo headphone jack of the iPod nano.

### Sport Arm Band

*NOTE: The Sport Arm Band consists of 2 pieces (band and iPod sleeve) and requires some assembly.*

1. Lift the Velcro closure on the back of the iPod sleeve.
2. Slide the iPod nano into the iPod sleeve (click wheel end first) so that the screen and click wheel can be seen through the iPod sleeve window.
3. Close the Velcro closure.
4. Slide the narrow end of the band through the iPod sleeve's until the wide end of the band is next to the iPod Sleeve's loop. The Velcro strips on the band should be facing the iPod sleeve.
5. With the band attached to the iPod sleeve, bring each end of the band together & slide the narrow end through the buckle on the wide end.
6. Slide the Sport Arm Band up your arm to the desired height and firmly secure the Velcro strap.

### Protective Screen Film

1. Using the white and black label tab, peel the front mask off of the Protective Screen Film.
2. Using the white and red label tab, peel the back mask off of the Protective Screen Film.
3. Place the Protective Screen Film (low adhesive side down) on the screen of the iPod nano. The edges of the Protective Screen Film should be flush with the screen of the iPod nano.

### Cleaning Cloth

1. To remove dust and finger prints and prevent grime from building up, simply wipe the screen of the iPod nano thoroughly with the Cleaning Cloth until the screen is clean. Do not use any cleaning fluid.

### Dust Cover

1. Insert the Dust Cover into the 30-pin connector port of the iPod nano anytime the 30-pin connector is not in use.
