WHAT IS IT?

The Quad Dock for PlayStation 3 is the best solution for charging up to four 1st party SIXAXIS controllers or Dual Shock 3 controllers. The Quad Dock's space saving design allows for controller charging in nearly any area of your home, with AC adapter charging there is no need to charge your controllers next to your gaming console. The Quad Dock features four LED charge indicators to provide a clear distinction between charging and fully charged controllers. The custom BLUE LED trim provides a cool and unique mood lighting experience.

WHY IT'S UNIQUE?

- Space saving design unlike most bulky chargers.
- AC adapter allows charging from any wall-out, also rids the need to leave your game console powered "ON" when charging is needed.
- LED charge and illumination effects.

THE COMPETITION?

- There are currently only Dual charging docks for PS3 on the market.
- All other chargers require charging to be done via the game console which requires the PS3 system to be powered "ON" for multiple hours.
- Provides a charge anywhere design with the included AC adapter.
